- Professional Memberships**
ISACA · UX Schweiz · alumniOST

PROFESSIONAL SUMMARY

IT and AI governance specialist with 15+ years in regulated industries – banking and financial services, high-tech, medical technology and precision manufacturing. Bridges regulatory requirements and technical delivery: from requirements engineering and process architecture to ITSM and GRC control, through to low-code automation in Microsoft 365 and Jira. Principal author of a private bank's group-wide AI directive (EU AI Act, NIST AI RMF, ISO/IEC 42001) and assessed AI initiatives against risk, control and documentation requirements. Reported directly to the COO. Stands for governance that works in daily operations, not just on paper.

PROFESSIONAL EXPERIENCE — OVERVIEW

Innovation & Project Manager

02/2024 – 05/2026

Sigma Bank AG

Schaan, Liechtenstein · Full-time · Reporting to COO

Owned IT, digitalisation and governance initiatives in a private banking environment – from tool selection through technical implementation to audit-ready operations.

- Delivery & Requirements Engineering:** End-to-end management of IT and digitalisation projects including feasibility studies, risk analyses and time, budget and quality control; requirements engineering for the IT service desk rollout (requirements catalogue, prioritisation workshops); led or significantly contributed to major system migration projects; integration concept, parallel run and exit scenarios for the reconciliation tool replacement.
- ITSM, Change & GRC:** Designed a multi-tenant hybrid architecture for IT service management (Microsoft 365 + Jira) with approval workflows for access rights and complete change logging; change manager including ticket handling and contribution to the Change Advisory Board; produced GRC-driven monthly and quarterly reports as a basis for C-level decisions.
- AI Governance & Assessment:** Principal author of the group-wide AI directive with the CISO (EU AI Act, NIST AI RMF, ISO/IEC 42001); assessed the AI initiatives commissioned by the executive board (RAG-based legal/compliance assistant, KYC automation) including requirements gathering across business units; on that basis delivered an AI readiness assessment (maturity evaluation, review against DORA, the EU AI Act and GDPR, business case, phased roadmap) with recommendations on data governance, IAM and AI governance for the executive board.
- Risk & Continuity:** Built audit-proof risk management documentation for business-critical systems (vendor risk analyses, exit strategies); designed and implemented audit-proof data archiving; TCO and business case analyses for C-level and project teams; owned the end-to-end test cycle for business-critical applications (ITSM, eBanking) including test documentation and defect analysis.
- Workplace Transformation & Adoption:** Established the group-wide M365 support team with a three-tier support model; low-code automation with Power Apps and Power Automate (change management tool, CAB approval and logical access workflows, automated HR forms); co-owned the bank-wide intranet and designed and delivered the LearningHub; coordinated the bank's year-end close as the interface between business units and IT.

Exam Supervision & Technical Support

12/2023 – 04/2026

University of St.Gallen (HSG)

St. Gallen, Switzerland · Seasonal

Ensured the smooth, secure and compliant delivery of centrally organised written examinations, combining student invigilation with identity, material and process checks, timekeeping and first-level support for computer-based exams, including login assistance, incident handling and escalation to the responsible exam leads in high-volume exam sessions.

International Trade Specialist

12/2019 – 07/2021

Safran Vectronix AG

Heerbrugg, Switzerland · Full-time

Managed end-to-end international trade and export operations in a Swiss high-tech defence and security environment, preparing shipping, customs and export documentation (incl. export licences and ATA carnets) for opto-electronic targeting and observation systems, coordinating international air, sea and road freight for controlled goods, processing import and export entries in e-trans and SAP and working closely with customs authorities and chambers of commerce to ensure export-control, sanctions and customs compliance.

Project Assistant – Corporate Rebranding

10/2022 – 04/2023

Sora Bank AG

Vaduz, Liechtenstein · Working Student 40%

Supported a bank-wide corporate rebranding at a Liechtenstein private bank by migrating and standardising Private Banking forms and client-facing templates from legacy documents to Adobe PDFs in line with the new corporate identity and compliance requirements, providing day-to-day project administration, acting as an internal point of contact for rebranding queries, coordinating information flows across functions and assisting with quality checks prior to go-live.

Customer Service Representative

10/2014 – 12/2019

Ivoclar Vivadent AG

Schaan, FL Liechtenstein · Full-time

Managed for a global leader in dental solutions the end-to-end B2B order-to-cash processing in SAP for subsidiaries and external customers, preparing shipping, export and dangerous goods documentation (ADR, Shipper's Declaration, IMO), coordinating international road, air and sea freight, processing EDI inbound orders for key accounts, mapping and maintaining customer service and after-sales processes in Confluence and supporting product presentations at international dental trade fairs.

Project & Event Manager

09/2021 – 04/2022

Bankenberatungszentrum | bbz st.gallen ag

St. Gallen, Switzerland · Working Student 80%

Responsible for the end-to-end planning and delivery of banking industry events (incl. Hypoforum at SIX ConventionPoint), covering budgeting, quality, timeline and cost control, website management (content, landing pages), marketing campaigns (email, web, social), event analytics, as well as operational participant and communications management, on-site support and first-level support for SAQ certifications.

Production Planning & Control (PPC) |

10/2010 – 09/2014

Sales & Export

SwissOptic AG

Heerbrugg, Switzerland · Full-time

Responsible for SAP-based production planning and materials requirements control across PP, MM, SD and QM for high-precision optical assemblies in a clean-room environment; maintained critical master data (BOMs, routings, planning parameters), coordinated with R&D and Engineering based on technical drawings and CAD data, handled internal sales and repair orders and oversaw export processing including tariff classification and origin of goods in SAP.
